Jonathan Rico

Senior Front-end Developer & UX Designer

SUMMARY

Hi, I'm Jonathan—a dynamic front-end developer with a keen eye for user-centric design. With a solid foundation in frameworks like React, Redux, and Next.js, I bring over a decade of hands-on experience in the evolving landscape of web development.

💻 Technical Proficiency:

React, Redux, Typescript: 5+ years
FramerMotion, GraphQL, NextJS, Apollo Client: 3 years
SCSS, Webpack: 9+ years
Jest, Storybook, Cypress: 5+ years

I've actively contributed to large-scale projects, leveraging a data-driven approach and collaborating with UX designers to architect optimal front-end solutions. Mentoring new developers is not just a task; it's a passion that fuels my commitment to continuous learning.

WORK EXPERIENCE

2022-05 - 2024-05

Senior Frontend Developer
Getaround
I was responsible for building new product features from start to finish. This involved everything from conception and research to documentation, maintenance, and polish. Additionally, I actively contributed to key initiatives aimed at maintaining an elegant system and maximizing productivity. I focused on building and improving processes and internal tools with simplicity and productivity in mind. Over time, I gained ownership of a part of the codebase and contributed to its growth in accordance with our standards and best practices. As part of the team, I reviewed code from my peers and actively used and contributed to our in-house design system. Collaboration on product vision and software design decisions was also a crucial part of my role.

2021-01 - 2022-05

Senior Front-end Developer
Airtm
Front-end development for a financial services application that relies on a cryptocurrency backend.

2013-06 - 2021-01

Front-end Manager
AllTheRooms
I was the lead front-end developer for a travel metasearch product with a cutting-edge front-end that became a touchstone throughout the travel industry. Started in Angular and successfully migrated to React/Redux. I developed the front end for a self-service B2B analytics product, using React, Next.js, GraphQL and Apollo client. My responsibilities included UX design.

2010-12 - 2013-06

Front-End Developer
Victory Productions
Develop a complex front-end application for an e-learning product, using web frameworks like Angular and Backbone

2009-02 - 2010-12

Front-end Developer
PRAGMA
Develop sites in Adobe Flash and HTML/CSS.
